

Exhibitor info 14 - WORLD OF FIREPLACES 2023 Only five days to go!

Dear Sir or Madam,

Do you know that feeling? After weeks of preparation for an event, you are finally just looking forward to it? You ask yourself: How will my innovations come across, what will the competition do? Who am I going to meet, what new exciting contacts will I establish? What questions will people ask and what will the answers be? What kind of business is going to be conducted?

It's quite clear: WORLD OF FIREPLACES is launching in Leipzig as the new flame of the industry. This is where business is done, this is where innovations are presented.

It is a meeting with business partners, colleagues and very often a meeting with friends.

We at trendfairs do our best to make sure you can enjoy these experiences. We are happy to be able to host you and all visitors for the first time. And we are looking forward to meeting you in only a few days.

Now, before we are ready to go on Monday you will receive a few details to get you in the mood for your WORLD OF FIREPLACES experience:

Podium at the Fireplace HUB

The Fireplace HUB serves as a podium for presentations and discussions on the topics of air pollution control, hybrid heat, supply, trade and more and is becoming the communication hotspot of the trade fair.

There will be room for presentations as well as consultation at the Fireplace Hub next to the Industrieverband Haus-, Heiz- und Küchentechnik e.V. (HKI), the Bundesverband Brennholzhandel und Brennholzproduktion e.V. (BuVBB), the Europäische Feuerstätten Arbeitsgemeinschaft (EFA), the Deutsche Biomasseforschungszentrum (DBFZ), the Gesamtverband Ofenbau e.V. (GVOB), the Fachagentur Nachwachsende Rohstoffe e.V. (FNR) as well as the Bundesverband des Schornsteinfegerhandwerks e.V. (ZIV)

Special show "Hybrid Heat"

Hybrid heating concepts are playing an increasingly important role in the climate debate. These include the combination of a residential fireplace and heat pump plus photovoltaics, for bridging particularly cold outside temperatures or for smoothing load peaks. Water-bearing stoves can be easily integrated in the existing heating system. By doing so, the stove not only provides comfortable heat in the room where it is installed, but also relieves the central heating system. An independent heat supply not only during blackouts and dark doldrums.

Visit the exhibitors of the "Hybrid Heat" special show at their stands:

- Kleining GmbH & Co. KG (stand no F 32)
- ORANIER Heiztechnik GmbH (stand no E 35)
- Ortner GmbH (stand no F 34)
- woldtke GmbH (stand no E33)
